Diving & Leisure – Cruise Itinerary

8 Days | 7 Nights

A Sanctuary of Marine Biodiversity

Raja Ampat, meaning “The Four Kings,” is a remote archipelago in Eastern Indonesia and one of the most biodiverse marine regions on Earth. Made up of more than 1,500 limestone islands and cays, it is dominated by the four main islands of Waigeo, Batanta, Salawati, and Misool. Long protected by isolation and respected by local Papuan communities, Raja Ampat remains deeply rooted in ancient traditions and legends.

Designated as a Marine Park, Raja Ampat lies at the heart of the Coral Triangle and is home to an extraordinary variety of coral species, reef fish, manta rays, and endemic wildlife. Above the water, jungle-covered karst islands, hidden lagoons, and pristine beaches form a dramatic landscape. Exploring Raja Ampat offers a rare immersion into a place where nature remains largely untouched and the sense of discovery is ever present.
